Mr. Rozansky added that the use of drones at special events are a concern and staff has a meeting scheduled with the City's police department and special event permitting staff as well as with the Sheriff's office and other County staff on how best to approach the issue. There was discussion regarding the available systems that identify the operator and location of a drone and the privacy issues associated with these systems. Commissioner Dustin asked if there was a height limitation on geofencing and if there were other security benefits of this application to consider. Mr. Rozansky said that he was uncertain if there was a height limitation and will provide updates as information becomes available. He said that staff is extremely proactive on this issue.

In response to Commissioner Dustin's comment regarding the decrease in total aircraft operations for the month of February as reported in the High Level Summary, Mr. Rozansky stated that operations were strong in October, November and December and the negative trend began in January.
